According to Mandel, a priwired so that conversations in vale electronics expert making the offices could be moni- a routine check of his office tored, but only if the lines discovered that the civil dewere tapped nearby, a com. fense phone - part of the napany spokesman said vester tional warning system installed by AT&T affiliates was capable of picking up and transmitting conversations in Mandel's office while the phone was cradled. The phone could not amplify the conversations, however, and any potential eavesdropper would have had to tap the line

> The telephone company said that the phone had been improperly wired but that a safeguard inside the statehouse would prevent transmissions from the cradled phone going any further.

would be "very difficult" to monitor conversations from that it could be done. "It reached for comment. would take almost a laboradel said he would have the emphatically not upset" by the

telephones including those in taken on an awfully dull tack the governors' offices in executive mansions or in statehouses. The governors' phones duplicate those operated by the "state warning point."

These phones are connected to three transmission points of the North American Air Delense Command: At Chevenne Mountain, Colo., in a two-story underground building in Denton. Tex., and at a classified location "outside Washington." According to the Office of Civil Desense, the system costs about \$1 million annually for maintenance and operation.

The phones are special, fourwire circuit devices designed to insure at least one-way transmission in an emergency. A spokesman for AT&T said last night that the wiring error could not in any way be duplicated on normal household telephones, which are differently constructed. Another company official said the phone company is preparing a complete explanation of the error for the public.

Delaware Gov. Russell W. Peterson learned that his phone was capable of eavesdropping after Mandel called him about the Maryland phone:

Pennsylvania Gov. Raymond P. Shaler had his phone checked earlier in the week by the phone company and announed that it had no prob-

lem. A spokesman for Shafer said yesterday that Shafer's Mandel's electronics expert phone had not been checked Edward Boyle, said that it since and that he was unaware. of any wiring defect.
